The Service Provider is not competent to set up any medical diagnosis, cannot confirm the presence or the lack of any illness, infection or disease. If there is a suspicion of a medical condition, the Service Provider reserves the right to refer the Client to medical care.

If the Client is underage, the Guardian of the Client shall give a written consent in person defining the services the Client may receive (Attachment 2). The Service Provider is not responsible for the quality and durability of these materials. The Client shall pay the full price of the service regardless of the origin of the decorating material – the application of the Client's product does not decrease the prices.

II. 6. Prices

The price list and the description of the services are made available by the Service Provider on the website and at the salon in a printed version. Should the published price lists differ, the price more favorable to the Client shall be applied. The obviously faulty price is invalid.

- gel polishing with strengthener – within 10 days from the service
- nail extensions size S – within 12 days from the service

will be handed over to the Client after the first gel polish/nail extension service in a printed version, and are also available on the website. Services using the Client's products cannot be deemed faulty/improper.

If the warranty periods are exceeded or faulty/improper service cannot be established, the Service Provider corrects any faults to the nails for the price indicated on the price list.

NAIL CARE INSTRUCTIONS

Dear Client,

Thank you for choosing Nail Suite Budapest!

Please follow the instructions below to ensure your manicure lasts you as long as possible.

Services	Approximate durability	
	Hands	Feet
Regular gel polish	2 weeks	3-4 weeks
Gel polish with strengthener (BIAB)	3 weeks	-
Nail extensions (acrylics or hard gel)	4 weeks	-
Nail prothesis	estimated individually	

Please check the General Terms and Conditions for the warranty regulations.

Although gel polished nails/nail extensions seem harder or more durable than the natural nails as they are covered with gel or acrylics, they must be taken care of properly.

- **Do not use your nails as tools!** Don't scrape stickers or dirt with your nails, do not use them to pry things apart, push buttons or drive in screws – if you wouldn't do something with your natural nails, don't do it with your gel polished/extended nails either! Your natural nails are right under the product and they might get injured or ripped off if you severely damage the gel attached to their surface.
- **Always wear gloves when cleaning and doing the dishes!** Chemicals might burn or dissolve the top layer of the gel polish, which can cause changes to the looks of the set. Soaking your hands regularly in water for extended periods of time might lead to product lifting.
- **Don't bite or pick your gel polish or nail extensions!** Gel polish is harder to damage than regular nail polish, but these repeated small traumas can significantly decrease the durability of the set.
- **Avoid nail injuries!** Please pay extra attention to the use of your hands until you get used to your new nail length. If your nail gets severely injured, e.g. smashed by the door, please seek help to professionally remove the product from the injured area as soon as possible. (Also if needed, seek medical help!)

- **Do not wear your set of nails longer than advised!** Your set might be in perfect condition even after the recommended wear time, however as your natural nails grow, the product is less and less attached to the part of your natural nail that connects to your finger, which makes it more and more likely that it will break or be ripped off together with your natural nail.
- **Do not try to remove your gel polish/nail extensions at home!** If you would like to return to your natural nails, please book an appointment for a removal service – unprofessional removal might do permanent damage to the natural nails.
